Blended Merchants vs IC++ Merchants

- If a merchant is under IC++ pricing for Card Acquiring (Visa & MC), then RTAU will also be IC++
- If a merchant is under Blended pricing for Card Acquiring (Visa & MC), then RTAU will also be blended. In this case you need to add the CKO fee on the tables on the left on top of the Scheme Fees which are:
 - Visa: \$0.12 per update
 - MC: \$0.125 per update

PRIVATE & CONFIDENTIAL

Market range is \$0.10 - \$0.35, with the concentration of fees being between \$0.15 - \$0.25

Pricing (statements)	<u>Range: \$0.16 - \$0.21</u>	<u>Range: \$0.10 - \$0.25</u>	<u>\$0.35</u>
Additional Information	Adyen is consistent with the pricing model they are using for RTAU and they are pricing IC++ in a price range of £0.15 up to €0.20 based on the pricing material we have. Even in proposals to merchants that get discounted pricing on other services, RTAU was not discounted significantly (we believe that €0.20 is their standard pricing).	Stripe's standard approach is charging for RTAU \$/£/€ 0.25. It is unclear if for IC++ merchants they pass through the Scheme Fees or not. In certain proposals to merchants that get discounted pricing on other services, RTAU was not discounted. We also have seen Stripe discounting the RTAU fee to \$0.10 (IC++) for a merchant processing c. \$250m/year	We only have one pricing data point from Nuvei where they are charging \$0.35 (IC++) to a High Risk merchant
